Land Application Treatment System:				
Type of Land Application Treatment System: Drip Spray Other, explain:				
Type of treatment facility preceding land application (recirculating media filters, lagoons, other, etc.):				
Attach a treatment schematic. Attached				
Describe methods to prevent and respond to any bypass of treatment or discharges (i.e., power failures,				
equipment failures, heavy rains, etc.):				
For New or Modified Projects:				
Name of Developer for the project:				
Developer address and phone number:				
For land application, list: Proposed acreage involved:				
Inches/week gpd/sq.ft loading rate to be applied:				
Is wastewater disinfection proposed?				
Yes Describe land application area access:				
No Describe how access to the land application area will be restricted:				
Attach required additional Engineering Report Information (see website for more information)				
Topographic map (1:24,000 scale presented at a six inch by six inch minimum size) showing the location of				
the project including quadrangle(s) name(s) GPS coordinates, and latitude and longitude in decimal degrees				
should also be included.				
Scaled layout of facility showing the following: lots, buildings, etc. being served, the wastewater collection				
system routes, the pretreatment system location, the proposed land application area(s), roads, property				
boundaries, and sensitive areas such as streams, lakes, springs, wells, wellhead protection areas, sinkholes				
and wetlands.				
Soils information for the proposed land disposal area in the form of a Water Pollution Control (WPC) Soils				
Map per Chapter 16 and 17 State of Tennessee Design Criteria for Sewage Work. The soils information				
should include soil depth (borings to a minimum of 4 feet or refusal) and soil profile description for each soil				
mapped.				
Topographic map of the area where the wastewater is to be land applied with no greater than ten foot				
contours presented at a minimum size of 24 inches by 24 inches.				
Describe alternative application methods based on the following priority rating: (1) connection to a				
municipal/public sewer system, (2) connection to a conventional subsurface disposal system as regulated by the Division of Groundwater Protection, and/or (3) land application.

#### **SOP APPLICATION – page 5**

Permit Number: SOP-\_\_\_\_

For Drip Dispersal Systems Only: Unless otherwise determined by the Department,				
sewage treatment effluent wells, i.e, large capacity treatment/drip dispersal systems after approval of the SOP Application, will be issued an UIC tracking number and will				
be authorized as Permit by Rule per UIC Rule 1200-4-614(2) and upon issue of a State	⊠ N/A			
Operating Permit and Sewage System Construction Approval by the Department.				
Describe the following:				
The area of review (AOR) for each Drip Dispersal System shall, unless otherwise specified by	the Department,			
consist of the area lying within a one mile radius or an area defined by using calculations under	1200-4-609 of			
the Drip Dispersal System site or facility, and shall include, but not be limited to general su	0 0 1			
features, general subsurface geology, and general demographic and cultural features within the				
this part of the application a general characterization of the AOR, including the following:	(This can be in			
narrative form)				
A general description of all past and present groundwater uses as well as the general ground	water flow			
direction and general water quality.				
A general description of the population and cultural development within the AOR (i.e. agric	ultural,			
commercial, residential or mixed)				
Nature of injected fluid to include physical, chemical, biological or radiological characterist				
If groundwater is used for drinking water within the area of review, then identify and locate				
topographic map all groundwater withdrawal points within the AOR, which supply public or	_			
water systems. Or supply map showing general location of publicly supplied water for the ar- obtained from the water provider)	ea (unis can be			
If the proposed system is located within a wellhead protection area or source water protection	on area			
designated by Rule 1200-5-134, show the boundary of the protection area on the facility sit				
Description of system, Volume of injected fluid in gallons per day based upon design flow,				
monitoring wells	merading any			
Nature and type of system, including installed dimensions of wells and construction materia	ls			
Pump and Haul:	⊠ N/A			
Reason system cannot be served by public sewer:				
Distance to the nearest manhole where public sewer service is available:				
When sewer service will be available:				
Volume of holding tank: gal.				
Tennessee licensed septage hauler (attach copy of agreement):				
Facility accepting the septage (attach copy of acceptance letter):				
Latitude and Longitude (in decimal degrees) of approved manhole for discharge of septage:				
Describe methods to prevent and respond to any bypass of treatment or discharges (i.e., power failures, equipment failures, heavy rains, etc.):

Holding Ponds (for non-domestic wastewater only):				
Pond use: Recirculation Sedimentation Cooling Other (describe):				
Describe pond use and operation:				
If the pond(s) are existing pond(s), what was the previous use?				
Have you prepared a plan to dispose of rainfall in excess of evaporation?   Yes No				
If so, describe disposal plan:				
Is the pond ever dewatered?  Yes No				
If so, describe the purpose for dewatering and procedures for disposal of wastewater and/or sludge:				
Is(are) the pond(s) aerated? Yes No				
Volume of pond(s): gal. Dimensions:				
Is the pond lined (Note if this is a new pond system it must be lined for SOP coverage. Otherwise, you must apply for an Underground Injection Control permit.)?   Yes No				
Describe the liner material (if soil liner is used give the compaction specifications):				
Is there an emergency overflow structure?  Yes No				
If so, provide a design drawing of structure.				
Are monitoring wells or lysimeters installed near or around the pond(s)? Yes No				
If so, provide location information and describe monitoring protocols (attach additional sheets as necessary):
